Peter Wright

Somerville, MA | +1-339-245-1419 | utopastac@gmail.com | www.f-90.co.uk

Executive Summary

Accomplished Principal Product Designer and Creative Prototyper with 20+ years of experience spanning global tech leaders (LinkedIn, Cash App, Twitter, Meta/Facebook, Spotify, Google), scale-ups, and entrepreneurial ventures. Proven track record of leading product strategy, driving trust and safety initiatives, scaling design systems, and building high-impact prototypes. Adept at bridging complex user needs, regulatory requirements, and technical implementation through a highly collaborative, user-centered approach.

Core competencies and skills

- **Product & Systems Design:** End-to-End Product Design, Design Systems, Trust & Safety, Subscription Experiences, Design Strategy, Interaction Design
- **Technical & Prototyping:** Creative Prototyping, ai native, Figma, UI/UX Architecture, React Native, Web & Mobile Layout Systems, HTML/CSS
- **Leadership & Mentorship:** Cross-Functional Leadership, IC Mentorship, Rapid Prototyping & Iteration, User Research & Usability Testing, Stakeholder Management
- **AI-Driven Experience & Strategy:** Spearheading AI product initiatives, AI-powered design workflows, generative interfaces, and trust & safety controls for AI features
- **Mobile & Native App Development:** End-to-end iOS development (SwiftUI), self-publishing mobile apps on the App Store

Professional Experience

LinkedIn, Principal Product Designer

2025 – Present

- Lead product design initiatives across Trust & Safety for all LinkedIn members worldwide, establishing defensible design patterns and protective frameworks.
- Partner cross-functionally with product, engineering, and policy teams to simplify complex trust workflows and elevate user security.
- Drive strategic AI product design initiatives across Trust & Safety, establishing human-in-the-loop safety frameworks and generative UX patterns for LinkedIn members.

Cash App, Principal Product Designer

2024 – 2025

- Spearheaded design strategy for user privacy, safety, and security in close coordination with regulatory compliance partners across financial services.
- Mentored and coached designers across Product, Content, and Research, accelerating team craft standards and execution speed.
- Drove cross-functional alignment on complex financial product features through rapid prototyping and collaborative problem framing.
- Led AI-driven prototyping tools and safety and trust features, exploring intelligent risk detection and automated customer protection experiences.

Personio, Senior Staff Product Designer

2023 – 2024

- Led end-to-end product design for the Apps ecosystem, driving add-on product strategies for Performance Management and Compensation.
- Architected interconnected Figma design systems and component libraries to streamline developer handoff and elevate UI quality across engineering teams.
- Defined and pitched future product experience visions to C-suite and senior stakeholders, unlocking blocked multi-week projects in days.

Twitter, Staff Product Designer

2021 – 2023

- Led design for key initiatives within Revenue Diversity, focusing on consumer and business subscription products (Twitter Blue).
- Conceptualized, prototyped, and tested high-velocity features, expanding subscription value offerings and longform content experiences.
- Mentored junior design talent and guided team strategy through data-driven user research and rapid prototype testing.

Facebook / Meta, Product Design Lead

2020 – 2021

- Led company-wide efforts for Community Integrity Legitimacy, establishing defensible, compliant UI/UX patterns across core products.
- Spearheaded design initiatives for The Oversight Board and Facebook’s public transparency reporting platforms.

Spotify, Principal Product Designer

2019 – 2020

- Directed design strategy across the Premium mission, driving growth through lean experimentation and rapid prototyping.
- Established inclusive, high-pace iteration processes across cross-functional squads to resolve core user friction points.

Google, Lead Interaction Designer

2018 – 2019

- Partnered across Geo (Google Maps) and Wearables/Health verticals to solve highly complex UI and systems problems.
- Conducted user-first exploratory research and rapid concept iteration to scope, test, and refine features.

FindCircles, Head of Product Design

2016 – 2018

- Founding team member of a VC-backed mental health peer support platform; built the product design foundation and grew the team from founders to 9 employees.
- Conducted 150+ 1-on-1 user interviews and built the initial MVP using React Native.

Entrepreneurial and early experience

- **Playpress Toys, Founder & Designer** (2013 – 2026)
  Co-founded and designed sustainable toy lines for young children in the UK.
- **Marks & Spencer Digital Innovation Lab, Product Development** (2013 – 2016)
  Applied lean startup principles to validate and build innovative digital experiences for a leading retail brand.
- **Advertising & Digital Agencies, Creative Technologist & Design Lead** (2005 – 2013)
  Designed and developed digital campaigns and interactive experiences for global brands including Mazda, Mercedes, and Channel 4.
- **Independent iOS Developer, App Development**
  Architected, designed, and published multiple native iOS applications utilizing SwiftUI, interactive widgets, and modern Apple design frameworks. Numo, Pixelator

Education

BA (Hons) Design for Communication
University of Reading (2001 – 2005)

- Coursework in Economics, Mathematics, and Statistics.

Selected peer feedback and leadership testimonials

- "Peter is perhaps the best non-manager mentor I have observed during my career. The speed at which he gained the ICs trust, improved their craft, and became a part of the team must be applauded and celebrated." **Cash App**
- "Peter is THE one designer everyone is comfortable with, goes to for help, and is looked to in terms of craft and behavior. There are ICs who are natural leaders. He is ours." **Cash App**

- "Peter scopes problems and trouble-shoots solutions faster than any designer I've ever worked with - this allows us to produce, test and throw out 10x more options, and arrive at the right way forward." **Google**
- "Peter has literally been a game changer when it comes to the quality of the design that we now have... He managed to unlock some projects that were previously blocked for weeks, in only a few days." **Personio**
